Industrial BURNER SERVICES

Rasmussen Mechanical Services Industrial Burner Services Division employs factory trained and authorized service technicians whose knowledge and experience will provide the quality and reliable service to facilitate all of your boiler start-up, commissioning, and combustion service needs. Our staff is qualified to deliver energy efficient solutions throughout your facility.

For decades, RMS has been providing burner services for many variations of heating and process equipment within the industrial, institutional, and commercial markets.

- Burner System and/or Burner Controls Retrofits, Conversions, Upgrades, or New Installations
- Process Burner Services
- Combustion Analysis & Adjustment to Air-to-Fuel Ratios
- Flame Safeguard Services
- Parallel Positioning and Linkageless Controls
- O₂ Trim
- Fully Metered, Cross Limited Combustion Controls
- Fuel Conversions (Natural Gas, Oil, Propane, Methane, Tallow)
- Emissions Monitoring
- Extensive Parts Inventory

Scheduled preventative maintenance services provided by RMS will minimize unexpected equipment failure which often leads to unplanned capacity or process downtime. In addition, RMS can assist in capturing several of the following desired savings advantages:

- Increased Production
- Reduced Fuel and/or Electricity Costs
- Reduced Emissions
- Improved Boiler and Boiler Room Safety
- Increased Life of Equipment
- Code Compliance
